There are risks involved with mutual fund investing, including the risk of loss of principal. There is no assurance that the investment process will consistently lead to successful results. Investments in international securities may entail unique risks, including political, market, regulatory and currency risks. In general, there is less governmental supervision of foreign stock exchanges and securities brokers and issuers. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment. There are risks associated with Small and Mid Cap investing such as less liquidity, limited product lines, and small market share.

Consider the investment objectives, risks, charges, expenses, and share classes of each ICON Fund carefully before investing.
