* A contingent deferred sales charge of 1.00% applies on certain redemptions within one year following purchases of \$1 million or more made without an initial sales charge.

¹ The Maximum Sales Charge (Load) and the Maximum Deferred Sales Charge (Load) will not be applied to grandfathered pre-merger Class I shareholders.

² Total Annual Fund Operating Expenses and Net Annual Fund Operating Expenses After Expense Reimbursement differ from the ratio of expenses to average net assets shown in the Financial Highlights, which reflect the operating expenses of the Fund and do not include acquired fund fees and expenses.

³ During the year ended September 30, 2016, ICON Advisers waived \$10,668, \$10,801 and \$13,848 and recouped \$3,210, \$1,446 and \$11,866 of Class A, C and S expenses, respectively. At September 30, 2016, ICON Advisers was waiving expenses for Class A, C and S.

⁴ In addition to the current expense waiver through 1/31/2021, effective January 26, 2017, the total expenses of the ICON Equity Income Fund (excluding interest, taxes, brokerage, acquired fund fees and expenses and extraordinary expenses) are contractually limited to an annual rate for Class A of 1.24%, an annual rate for Class C of 1.99%, and an annual rate of 0.99% for Class S through January 31, 2018. This expense limitation may revert back to the current limits any time after January 31, 2018 upon 30 days' written notice of termination to the Fund's Board of Trustees. ICON Advisers has contractually agreed to limit the total expenses of the Fund (excluding interest, taxes, brokerage, acquired fund fees and expenses and extraordinary expenses) to an annual rate for Class A of 1.45%, an annual rate for Class C of 2.20%, and an annual rate of 1.20% for Class S. This expense limitation may be terminated at any time after January 31, 2021 upon 30 days' written notice of termination to the Fund's Board of Trustees. ICON Advisers is entitled to reimbursement from the Fund of any fees waived pursuant to this arrangement if such reimbursement does not cause the Fund to exceed existing expense limitations and the reimbursement is made within three years after the expenses were reimbursed or absorbed.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class A	\$713	\$1,046	\$1,411	\$2,459
Class C	\$322	\$ 728	\$1,276	\$2,809
Class S	\$121	\$ 422	\$ 750	\$1,689

You would pay the following expenses if you did not redeem your Class C shares:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class C	\$222	\$728	\$1,276	\$2,809

Portfolio Turnover.

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 145% of the average value of the portfolio.

Principal Investment Strategies.

The Fund uses a quantitative methodology to identify securities ICON believes are underpriced relative to value. It normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies of any market capitalization, including convertible and preferred securities, and in securities issued by dividend-paying companies. This strategy may not be changed unless Fund shareholders are given at least 60 days' prior notice.

ICON believes that equity markets go through themes over time, simply stated, stocks in industries that were market leaders at one time tend to become overpriced relative to intrinsic value, and stocks in industries that were not in favor tend to drop below intrinsic value. In general, the Fund will sell industries ICON believes are overpriced and buy industries we believe are underpriced. The Fund may invest up to 25% of its assets in a single industry. ICON's combination of industry rotation and bottom-up valuation distinguishes us from other investment managers. The Fund may also invest in U.S. government agencies or government sponsored enterprises and investment-grade

securities, although the Fund may invest up to 25% of its total assets in securities with a lower rating by both S&P and Moodys.

Principal Investment Risks

Like all investments in securities, you risk losing money by investing in the Fund. The main risks of investing in this Fund are:

- **Credit Risk.** The Fund could lose money if the issuer of a security is unable to meet its financial obligations or goes bankrupt. Failure of an issuer to make timely payments of principal and interest or a decline or perception of decline in the credit quality of a convertible security can cause a convertible security's price to fall, potentially lowering the Fund's share price.
- **Changes in Debt Ratings.** If a rating agency gives a convertible security a lower rating, the value of the security may decline because investors will demand a higher rate of return.
- **Interest Rate Risk.** Prices of convertible securities tend to move inversely with changes in interest rates. For example, when interest rates rise, prices of convertible securities generally fall. Securities with longer maturities tend to be more sensitive to changes in interest rates. Due to their hybrid nature, convertible securities are typically more sensitive to changes in interest rates than the underlying common stock, but less sensitive to interest rate changes than a fixed-rate corporate bond.
- **Industry and Concentration Risk.** Companies that have similar lines of business are grouped together in broad categories called industries. Certain industries are grouped together in broad categories called sectors. The Fund may overweight industries within various sectors and may invest up to 25% of the Fund's total assets in a single industry. The fact that the Fund may overweight a specific industry or industries may cause the Fund's performance to be more susceptible to political, economic, business or other developments that affect those industries or sectors. This overweighting means the Fund may be less diverse and more volatile than its benchmark.
- **Portfolio Turnover Risk.** The Fund is an actively managed mutual fund that buys and sells securities using a value-based quantitative methodology. ICON regularly evaluates the securities in its portfolio and rebalances the portfolio based on the value of the securities, industries, sectors and countries held by the Fund. Trading necessarily follows ICON's active management style. Rebalancing the portfolio may require actively trading the Fund's securities, which can lead to a Fund composition that deviates considerably from the Fund's benchmark. Moreover, while ICON hopes its investors purchase for the long

term, shareholders buy and sell securities and mutual funds for various reasons, which generally requires the Portfolio Manager to make buy and sell decisions daily, and thus to trade. Active trading generates transaction costs which, in turn, can affect performance. A portfolio with higher turnover may thus underperform a comparable portfolio with a lower turnover rate, if the Portfolio Manager's decisions to trade based on value is not realized by the market.

- **Stock Market Risk.** The value of the stocks and other securities owned by the Fund will fluctuate depending on the performance of the companies that issued them, general market and economic conditions, and investor confidence. The market also may fail to recognize the intrinsic worth of an investment or ICON may misgauge that worth.
- **Small and Mid-Size Company Risk.** The Fund may invest in small or mid-size companies which in turn may involve greater risk of loss and price fluctuation. The trading markets for securities of small-cap issuers may be less liquid and more volatile than securities of larger companies.
- **Government Agency Securities Risk.** Securities issued by U.S. government agencies or government-sponsored enterprises may not be guaranteed by the U.S. Treasury. Government National Mortgage Association ("Ginnie Mae") is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest on securities issued by institutions approved by Ginnie Mae and backed by pools of mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veteran Affairs. Government-related guarantors are not backed by the full faith and credit of the U.S. government and include the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). Pass-through securities issued by Fannie Mae are guaranteed as to timely payment of principal and interest by Fannie Mae, but are not backed by the full faith and credit of the U.S. government. Freddie Mac guarantees the timely

payment of interest and ultimate collection of principal, but its participation certificates are not backed by the full faith and credit of the U.S. government.

- **Foreign Investment Risk.** Up to 20% of the Fund's net assets may be invested in foreign securities. Investments in foreign securities involve different risks than U.S. investments, including fluctuations in currency exchange rates, potentially unstable political and economic structures, less efficient trade settlement practices, reduced availability of public information, and lack of uniform financial reporting and regulatory practices similar to those that apply to U.S. issuers. Foreign stock markets may also be less liquid than U.S. stock markets.
