

FUND OBJECTIVE & PRINCIPAL INVESTMENT STRATEGIES

The ICON Industrials Fund seeks long-term capital appreciation. It uses a quantitative methodology to identify securities ICON believes are underpriced relative to value. It normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies in the Industrials sector (as determined by the Global Industry Classification Standard). Equity securities in which the Fund may invest include common stocks and preferred stocks of companies of any market capitalization. This strategy may not be changed unless the Fund shareholders are given at least 60 days' prior notice.

TOP 10 EQUITY HOLDINGS (%)

General Electric Co.	7.07
Johnson Controls International PLC	6.23

GROWTH OF \$10,000 INVESTMENT (5/9/97 - 3/31/17)

NET PERFORMANCE: \$30,827

A hypothetical \$10,000 investment in the ICON Industrials Fund, Class S on 5/9/97 would have been worth \$30,827 on 3/31/17. The performance results reflect the deduction of management fees, brokerage commissions, and expenses and the reinvestment of dividends and other distributions made to client accounts. The data quoted represents past performance, which is no guarantee of future results.

**Not annualized. The data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the data quoted. Please call 1-800-828-4881 or visit www.InvestwithICON.com for performance results current to the most recent month-end. Returns assume the reinvestment of dividends and capital gain distributions and reflect applicable fees and expenses. Performance without maximum sales charge does not include front-end or contingent deferred sales charges. Performance is for the Fund's Class S shares. Performance for the Fund's other share classes will vary due to differences in charges and expenses.*

- » Disciplined
- » Active, tactical industry rotation

IMPORTANT INFORMATION

There are risks involved with mutual fund investing, including the risk of loss of principal. There is no assurance that the investment process will consistently lead to successful results.

An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment. There are risks associated with small- and mid-cap investing such as less liquidity, limited product lines, and small market share.

ICON has contractually agreed to limit the total expenses of the Fund (excluding interest, taxes, brokerage, acquired fund fees and expenses and extraordinary expenses) to an annual rate for Class S of 1.50%. This expense limitation may be terminated at any time after January 31, 2018 upon 30 days written notice to the Fund's Board of Trustees. ICON is entitled to reimbursement from the Fund of any fees waived pursuant to this arrangement if such reimbursement does not cause the Fund to exceed existing expense limitations and the reimbursement is made within three years after the expenses were reimbursed or absorbed. Gross Expenses are all customary expenses incurred by a Fund, excluding, where applicable, waivers, reimbursements, and contractually agreed-to limits of the total expenses by the Fund's adviser. Net Expenses are all customary expenses incurred by a Fund, including, where applicable, waivers, reimbursements, and contractually agreed-to limits of the total expenses by the Fund adviser.

Performance and expense data shown is for Class S only. Data for other share classes will vary and is available at www.InvestwithICON.com.

ICON's value-based investing model is an analytical, quantitative approach to investing that employs various factors, including projected earnings growth estimates, in an effort to determine whether securities are over- or underpriced relative to ICON's estimates of their intrinsic value. ICON's value approach involves forward-looking statements and assumptions based on judgments and projections that are not guarantees of future results. Value investing involves risks and uncertainties and does not guarantee better performance or lower costs than other investment methodologies.

The unmanaged Standard & Poor's (S&P) Composite 1500 Index is a broad-based, capitalization-weighted index comprising 500 large-cap, 400 mid-cap, and 600 small-cap U.S. companies. The S&P 1500 Industrials Index is an unmanaged capitalization-weighted index comprising companies in the Industrials sector as determined by S&P. Total returns for the unmanaged indexes include the reinvestment of dividends and capital gain distributions but do not reflect the costs of managing a mutual fund. The Fund's composition may differ significantly from the indexes. Individuals cannot invest directly in an index.
