About the Portfolio

We believe the primary key to successful investing in the U.S. stock market is tied directly to sector rotation and timely industry rotation within each sector.

The Global Growth Portfolio strives to increase the value of your account through a rise in the market price of securities or NAV of funds (capital appreciation) invested in U.S. sector, bond, and international mutual funds.

⁴Allocations are based on the most recent New Money Target report and fund holdings as of the most recent quarter-end. Cash & Cash Equivalents data is based on the aggregate of the cash position in the Portfolio and any cash positions in the underlying mutual funds. All fund holdings data is an estimate based on the most recent quarter end positions. Other Assets and Liability figures within each Fund are not separately reported but are not included in the Funds' Net Asset Value.

Important Information

ICON Advisers, Inc. ("ICON") is a registered investment adviser incorporated in 1991. ICON uses a disciplined, objective, non-emotional methodology to identify industries and sectors that our methodology suggests are underpriced relative to our calculation of intrinsic value. ICON utilizes sector and industry rotation to invest in U.S. and foreign securities of any market capitalization. ICON offers its disciplined, objective, non-emotional methodology across a wide range of portfolio solutions, including tactical fund allocation portfolios, diversified and sector mutual funds, as well as diversified and concentrated separate accounts. Investing in securities involves inherent risks, including the risk that you can lose the value of your investment. There is no assurance that the investment process will consistently lead to successful results. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment, and the Technology sector has been among the most volatile sectors in the market. There are risks associated with selling short, including the risk that the Long/Short Fund may have to cover its short position at a higher price than the short price, resulting in a loss. The Fund's loss on a short sale is potentially unlimited as a loss occurs when the value of a security sold short increases. Call options involve certain risks, such as limited gains and lack of liquidity of the underlying securities, and are not suitable for all investors. Investments in international securities may entail unique risks, including political, market, regulatory and currency risks. Financial statements of foreign companies are governed by different accounting, auditing, and financial standards, which help ensure the integrity of public information in the United States, do not exist in foreign countries. In general, there is less governmental supervision of foreign stock exchanges and securities brokers and issuers. An investment in a region fund may involve greater risk and volatility than a more diversified fund. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment. There are risks associated with selling short, including the risk that the Long/Short Fund may have to cover its short position at a higher price than a short price, resulting in a loss. The Fund's loss on a short sale is potentially unlimited as a loss occurs when the value of a security sold short increases. There are risks associated with Small and Mid Cap investing such as less liquidity, limited product lines, and small market share.

Portfolio composition and holdings are subject to change at any time and should not be construed as a recommendation of any security. Individual account holdings and composition may vary. Opinions and forecasts regarding sectors, industries, companies, countries and/or themes, and portfolio composition and holdings, are all subject to change at any time, based on market and other conditions, and should not be construed as a recommendation of any specific security, industry, or sector.

ICON claims compliance with the Global Investment Performance Standards (GIPS®). The periods prior to January 1, 1995 have not been verified. To receive a complete list and description of ICON's composites and/or a presentation that adheres to the GIPS® standards, please call 1-800-828-4881 or visit www.InvestwithICON.com. Additional information regarding ICON's policies for calculating and reporting returns is available upon request. Returns are calculated in U.S. dollars. The Portfolios do not utilize leverage or derivatives, although ICON may invest in mutual funds that utilize these tactics.

The Morgan Stanley Capital International (MSCI) All Country World Index ex-United States (ACWI ex-U.S.) is a leading unmanaged benchmark of international stock performance. The capitalization-weighted index is representative of the performance of securities of companies located in developed and emerging markets outside of the United States. The Bloomberg-Barclays U.S. Treasury Bellwether (3 Months) Index is a market value-weighted index of investment-grade fixed-rate public obligations of the U.S. Treasury with maturities of 3 months, excluding zero coupon strips.

Total returns for the unmanaged indexes include the reinvestment of dividends and capital gain distributions but do not reflect deductions for commissions, management fees, and expenses. The indexes are not covered by the report of independent accountants. The Portfolio's composition may differ significantly from the index. Individuals cannot invest directly in an index.
