Investment return and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the data quoted. The performance results displayed represent the composite performance for all discretionary client accounts in a Portfolio. The performance results reflect the deduction of actual management fees and trading expenses, the reinvestment of dividends and other distributions made to client accounts. As of 8/31/2017, 23.34% of the accounts in the SBI Global Conservative Composite have not paid management fees.

¹As of 8/31/2017, 23.34% of the accounts in the composite have not paid management fees, the payment of which would have lowered performance. Performance for individual accounts will vary from the composite. For the period from 8/31/12 through 10/14/15 the composite was not rebalanced to account for portfolio drift. Contact ICON Advisers for more information on the composites.

²The adjusted performance results are calculated by reducing the actual composite performance by the maximum net direct management fee for the Portfolio (1.55% annually) for each period. For example, if the composite returned x% for the annualized 3-year period, the performance with maximum net direct management fee shown would be ((x%) - 1.55%). For periods less than one year, the annual maximum net direct management fee is adjusted based on the number of months in the period.

**The SBI Global Conservative Blended Benchmark is made up of 68% Bloomberg-Barclays US Universal, 30% MSCI AC World Index, and 2% Bloomberg-Barclays US Treasury Bellwethers (3 Months) Index. The benchmark is rebalanced monthly.
